

APPENDIX 6

What to Do—

If you have not received free Advisory Circulars ordered from the Department of Transportation (DOT) after your SECOND WRITTEN REQUEST, please mail the two order forms which state why the request(s) was not filled to the Consumer Hotline at the address below. Each unfilled request form must have the DOT stamp (see sample below) along with a daytime telephone number (including area code), address, and list of Advisory Circular numbers.

Advisory Circulars are also available through the Internet. See last page of Appendix 6 for Internet addresses and other Bulletin Board information.

DEAR REQUESTER: We appreciate your interest in Federal Aviation Administration (FAA) publications. However, we are unable to forward all the items you requested at this time. On your request we have written a number which tells the status (as listed below) of items not included in this mailing.

- 1-Out of stock (reorder in 90 days)
- 2-Being revised
- 3-Cancelled, no replacement

- 4-Cancelled by _____ (enclosed)
- 5-Other _____

ELECTRONIC BULLETIN BOARD ACCESS INFORMATION

FAA CORPORATE BULLETIN BOARD (FAACBB)

The FAA Corporate Bulletin Board system (FAACBB) is a centralized means of distributing information to the FAA and to the public. The FAACBB can be accessed via a toll free 1 800 number in conjunction with a PC and a modem. The FAACBB can handle up to eight calls simultaneously. The FAACBB contains such information as the Advisory Circular Checklist, the AF special interest group area, the Air Traffic Quality Assurance and the Flight Standards Bulletins, to name a few.

The FAACBB also has an interchange facility that allows users to use the FAACBB as a gateway to other FAA Bulletin Boards including the Airports BB, Air Traffic Operations BB, Pilot Exam BB, Aeromedical Forum BB, and the Safety Data Exchange BB to name a few. Some of the Advisory Circulars can be found posted on the Safety Data Exchange BB.

The FAACBB is maintained by the Office of Information Technology (AIT) for agency use. The FAACBB can be dialed at 1-800-224-6287. A PC with a modem and communications software will be required. The first time you call the FAACBB, you will be prompted by the system to answer some questions on-line. This is required by any user wishing to access the system. It is necessary to answer these questions since this is how to obtain your user ID and password in order to fully access the FAACBB. You will be required to fill out this on-line questionnaire only once. More information on the FAACBB is available by calling the AIT help desk at 202-267-9920.

Equipment Requirements

Computer with Modem (286 or better type PC)
Communications software (ex. Procomm or QmodemPro)

Bulletin Board Requirements

Telephone number: 1 800 224-6287
Data Bits: 8
Parity: (N)one
Stop bits: 1
Baud Rate 300 - 14400 BPS

System Operator: Willy Williams, DOT
(202) 366-5534
Program Oversight: Paul Evans, AIT 300
(202) 267-9992

OFFICE OF AIRPORT SAFETY AND STANDARDS ELECTRONIC BULLETIN BOARD (BBS)

Several publications initiated by the Office of Airport Safety and Standards contain information that changes often. An electronic bulletin board has been established to provide timely access to such information. Certain new and changed advisory circulars and technical reports will be available for downloading from the bulletin board immediately upon their approval. In addition, several computer programs of use to airport operators and designers have been produced by the Office of Airport Safety and Standards. They also may be downloaded from the bulletin board. A list of the current dates and version numbers of all 150 (Airports) series advisory circulars and many other publications issued by the Federal Aviation Administration (Advisory Circular Checklist) is posted, indicating which are presently available for downloading. There is no charge to access the bulletin board or download information.

Equipment Requirements

Computer with Modem
Communications software

Bulletin Board Requirements

Telephone number: 1 800 224-6287
Data Bits: 8
Parity: (N)one
Stop bits: 1
Baud Rate 300/1200/2400/9600/14400
System Operator: Rick Marinelli, AAS-100
(202) 267-7669

Jeff Rapol, AAS-200
